

Dr Patrick MacManaway

Quantum Leap

Level Two Workshop

Coming in 2017

The Level 2 workshop is the second of a three part series, and building on the material covered in Level 1 it provides further understanding and confidence in the application of subtle energy benefits on your farm, in your home and community.

- ✓ Use the collective power of the group to remotely apply newly acquired skills to your property.
- ✓ Develop your capacity to perceive and engage with the natural intelligence of the ecosystem.
- ✓ Understand the power of being energetically in balance and be empowered to cultivate life energy around you.
- ✓ Be able to participate and creatively influence core life processes impacting soils, plant growth, animal health, machinery and farm economics.
- ✓ Hear the results that have been achieved internationally in both animal and crop production, as well as at-home applications.

Registration Details

Same Level Repeat	\$500 + gst per person
Early Bird	\$1,399 + gst per person
Current ExecutiveLink Member	\$1,399 + gst per person
Normal Registration Price	\$1,799 + gst per person

Includes morning tea, lunch, afternoon tea, facilitation by Dr Patrick MacManaway and workshop materials.

What is Subtle Energy?

Subtle Energy was first introduced by Einstein, and has now become the science of Quantum Physics. It is based on frequencies which affect organisms at a cellular level, and can also be described as pathways of energy running within and between all things.

Subtle Energy can be harnessed not only to heal the human body, but also mend and improve our landscape, allowing optimisation of growing conditions for animals and plants. There are agricultural benefits to utilising Subtle Energy, such as; extended length of growing season; improved disease and drought resistance; and increased yield.

Best known in the health industry for its applications within Kinesiology and other human healing, Subtle Energy and its application is relatively new to agriculture.

On-farm Consulting

On-farm consulting is available.

Give us a call if you'd like a quote, or to arrange a consult direct to your home, business or farm!
